

GUIDE - COMPATIBLE SET-TOP TO THE TFLM FIBER NETWORK

COMPATIBILITY

Not all set-tops on the market are compatible with our TFLM network, it will not be possible to put them into service. For example, Bell set-tops, Videotron set-tops or satellite set-tops are not.

Motorola / Arris DCX set-tops are compatible with our network. You are free to get this type of set-top on the resale market. However, please note that:

- ✓ If the set-top is registered on another network (other than TFLM), it cannot be put into service on the TFLM network. It must be disabled from the network on which it is activated. TFLM cannot perform this deactivation.
- ✓ Any illegal set-top will be marked and it will be impossible to put it into service. In addition, the owner will be notified automatically by the network administration.
- ✓ \$ 25 non-refundable initialization fee is required for any set-top provided by the customer (except for current digital APTR customers)

SET-TOPS FOR SALE AT TFLM

Easy to use, you can configure the terminal according to your habits and your favorite channels by always obtaining an incomparable picture quality and sound. Your digital terminal is your ally. It allows, among other things, to activate the parental control and create a list of favorite channels.
